DAILYCARE REJUVENATING LINE

“Self- Skin Booster treatment at Home!”

What is Skin booster??

Skin boosters are aesthetic medical treatments that use active ingredients such as hyaluronic acid, PDRN, amino acids, vitamins., to deeply rehydrate and regenerate the skin.

Skin boosters are directly injected into the dermal layer of the skin and require professional procedures such as injection, MTS, and iontophoresis..

CURENEX

DAILYCARE REJUVENATING LINE

CURENEX KEY INGREDIENTS

CURENEX DAILYCARE REJUVENATING LINE is developed to nourish skin cells
with ingredients used by dermatologists.

CURENEX DAILYCARE LINE KEY INGREDIENTS

PDRN (Salmon DNA) | Skin Cure

PDRN aids cell viability, extracellular matrix formation (ECM), Angiogenesis and other medical applications.

Its initial use case is the treatment and repair of damaged tissue, but it has been developed to use for skin rejuvenation.

PDRN regenerates tissue by activating micro vessels and activates fibroblasts to help produce collagen.

MULTI PEPTIDE COMPLEX | Nourishing

Peptides have a intercellular messenger function from brain to nerve and muscles. It is excellent for skin regeneration, a component known as Baby skin solution.

HYALURONIC ACID | Hydration

Hyaluronic Acid is an essential component in anti-aging solutions.

It is also naturally found in skin tissues.

Hyaluronic acid has restorative abilities and can boost skin moisture content, soothe, and defend against dry skin.

CURENEX

DAILYCARE REJUVENATING LINE

GLUTATHIONE & NIACINAMIDE | Whitening

Glutathione called Vitamin G is an essential nutrient in the body.

It helps remove free radicals and inhibits the activity of the ingredients that make melanin pigments. Plus, the most important role is skin whitening.

Niacinamide removes free radicals and inhibits the activity of the ingredients that make melanin pigments.

Collagen | Elasticity

It improves skin elasticity by stimulating cells that produce new skin tissue.

Ceramide | Build-up skin barrier

found naturally in skin and restores and maintains the skin's natural barrier.

Panthenol | Anti-inflammatory

Panthenol works as a skin protectant with anti-inflammatory properties. It can help improve hydration and elasticity.
